

INSPECTION POLICY

## A. Suspension:

Three (3) consecutive violations for the same item.

## B. Reinstatement Requirements:

1. Signed "Application for Reinstatement" (see example on page 12) must be received by the state milk inspector or the Milk Safety Branch.
2. Milk tank must be empty at time of inspection.
3. Dairy must be in substantial compliance for reinstatement.

\* Application for reinstatement may be faxed.

\*\* Grade A producer suspended for farm conditions may sell milk to a manufacturing plant for 10 (ten) days. After 10 days failure to respond or request a manufacturing permit, will result in the producer being deleted from the list of active dairy producers.

\*\*\* The Milk Safety Branch will notify plant and state milk inspector when a producer is suspended and reinstated.

\*\*\*\* It is the plant's responsibility to notify hauler, producer, and fieldmen when a producer is suspended and reinstated.
